

GUIDED AIR-SURFACE MISSILE E-24-A1

PURPOSE:

The E-24-A1 guided missile is launched from the modernized version of the ORAO J-22, and is intended for the destruction of directly visible ground targets that are stationary or slow-moving, such as bunkers, fortified buildings, tanks, etc. The missile is aileron-controlled and it uses Command to LOS guidance.

TECHNICAL CHARACTERISTICS:

Diameter:	240 mm
Weight:	255 kg
Length:	2581 mm
Warhead:	123 kg (shaped charge / blast)
Range:	20 km (from 7 km height)
Guidance:	Command to LOS
Max velocity:	1.7 Mach (supersonic)
Rocket engine operating time:	1.1s
