

MALYUTKA 2T

Guided missile MALYUTKA 2T is a modification of anti-armored missile Malyutka 9M14P1, equipped with tandem shape charged warhead of increased penetration, which enables neutralization of tanks and other armored vehicles, with or without ERA, as well as for neutralization of firing posts and fortifications, at the distances from 500 m to 3.000 m.

TECHNICAL CHARACTERISTICS:

Maximum range	3000 m
Minimum shooting distance	500 m
Warhead	tandem shape charged
Warhead penetration	750 mm behind ERA
Flight to max. range	≤ 30 s
Flight speed	110 m/s
Missile length	1000 ÷ 1100 mm
Caliber	125 mm
Wing span	393 mm
Missile weight	12.5 ÷ 13.5 kg
Guidance	Semi-automatic
Transfer of commands	Microcable
Max. lateral acceleration	> 20 m/s ²
Shooting probability	> 80 %
Temperature range	-30 °C до +50 °C
