

COMBAT MULTICOPTER "OBAD"

Armed short-range combat multicopter OBAD is UAS which is designed for rapid deployment and high mobility military applications. It can destroy and disable close distance objects and armored or non-armored vehicles and manpower. OBAD can be operated manually or programmed for autonomous operation, utilizing the systems advance avionics and precise GNS navigation which provides greater precision accuracy and reliability. It is intended for day and night reconnaissance, collecting intelligence data as well as target acquisition, destruction and multi-purpose payload integration.

PERFORMANCE

Engine:	eight BLDC motors
Power:	68.8 KW
Propeller:	composite two blades, contra rotating
Operating weight:	120kg
Payload weight:	40 kg
Cruising speed:	45 km/h
Operational altitude:	up to 500 m above ground
Flight Duration:	15-20 minutes
Takeoff/Landing:	vertical takeoff and landing from almost every spot
Range:	5 km+

REMOTE CONTROLLED WEAPON STATION

Weapon:	4 anti-tank unguided missiles RBR M80 64 mm with 400 m range
RCWS movement range:	azimuth: $\pm 20^\circ$ elevation: $-45^\circ \div +5^\circ$
Observation-sighting device:	- daylight CCD camera with continual optical zoom 30x - thermovision camera with digital zoom 4x - laser rangefinder, up to 5 km range
Control:	remote wireless controlled
