

COMBAT MULTICOPTER "OBAD"

Armed short-range combat multicopter OBAD is UAS which is designed for rapid deployment and high mobility military applications. It can destroy and disable close distance objects and armored or non-armored vehicles and manpower. OBAD can be operated manually or programmed for autonomous operation, utilizing the systems advance avionics and precise GNS navigation which provides greater precision accuracy and reliability. It is intended for day and night reconnaissance, collecting intelligence data as well as target acquisition, destruction and multi-purpose payload integration.

PERFORMANCE

Engine:	eight BLDC motors
Power:	68.8 KW
Propeller:	composite two blades, contra rotating
Operating weight:	120 kg
Payload weight:	40 kg
Cruising speed:	45 km/h
Operational altitude:	up to 500 m above ground
Flight Duration:	15-20 minutes
Takeoff/Landing:	vertical takeoff and landing from almost every spot
Range:	5 km+

REMOTE CONTROLLED WEAPON STATION

Weapon:	2 unguided bombs 120 mm
Weapon weight:	25,2 kg
Explosive charge:	hexolit or TNT
Lethal radius:	20 m
Control:	remote wireless controlled
